## Domain Name

Your domain name is your real estate on the inside of the Information Super Hi-Way. This is your starting point for getting the exposure you're seeking by building an Internet presence.

First thing we must do is **research** the domain name of our choice to see if it is available. We do this by querying a whois database; whois databases allow us to search through available domain names to see if the name we want is taken or not.

Once we find a domain name that is suitable, we must **choose** and **register** that domain name.

**Lintel Services provides this service for \$10 per annual domain name registration.**

## Hosting

Normally, our Hosting Company will provide your DNS or Name Server provisioning for you in house. This means, you won't need to worry about this, as the Hosting Company will handle it for you.
